Global Elections Security
UK & Western Europe Roundtable

<u>**Agenda**</u>

14:00-14:10 GMT: Welcome and Opening Remarks
By Drew Bagley, Vice President and Counsel for Privacy and Cyber Policy at CrowdStrike

14:10 - 15:20 Roundtable discussion
    14:10 - 14:20 Topic Introduction
By Brian Cute, COO and Capacity & Resilience Program Director at Global Cyber Alliance, and Tarun Chaudhary, Global Cyber Diplomacy Specialist at IFES
The aim of this discussion is to share experienced threats and actionable best practices in any of the following:
1. Core Electoral Process Systems: voting machines, software & hardware manufacturers, supply chain security, election management systems
2. Electoral Process Support Organisations: election commissions, electoral registers, and state, regional and local officials
3. Electoral Platforms Affecting Public Opinion: news organisations, political parties, social media platforms, donor groups

Discussions will be stirred around **Actionable Tools and Services** and will focus on - but not be limited to:
    14:20 - 14:35 Technology, for example:
- Identification and Implementation of cybersecurity best practices such as rigorously securing email
- News verification and screening methodologies on search and social media platforms
- Experiences integrating commercial off the shelf hardware and software

    14:35 - 14:50 Policy, for example:
- What distinguishes election environments in terms of data?
- What risk models can/should be applied by election managers and stakeholders?
- Identify schemes to notify cyber incidents
- Define transparency schemes around digital political advertisements

    14:50 - 15:05 Collaboration, for example:
- How should the tension of election management independence and critical national infrastructure be navigated?
- Identify partnership models for government, nonprofits, and industry to share information and tools
- Roles and responsibilities for government, nonprofits, and industry in providing tailored and vetted tools and services to support election security

    15:05 - 15:20 Resources and skills, for example:
- How can voters and students be equipped to distinguish trustworthy information from suspicious ones?

15:20 - 15:30 Conclusion and Closing Remarks
By Drew Bagley, Vice President and Counsel for Privacy and Cyber Policy at CrowdStrike
